In addition to sporting a rugged case like all the other tablets at CES, it's also got a stylus and a 5.7-inch touch screen running Android 2.1. Panasonic is going to launch the tablet in the US, but you can expect more countries around the world to get their hands on the device in the not-too-distant future. [In other tablet news, Sony has announced details of its 42-inch long-for-42-inch Android tablet, and we have our first look at the build quality of the first Android tablet with a stylus from Samsung.]Q: How to archive unselected textarea in extjs4 I am using xtype=textarea to populate values in a textarea. But i need to archive the already filled values and only show empty textarea on load. How can i archive these? A: There are no standard validations in ExtJS out of the box, you can write your own however. Here is a simple example that you can expand on, extend whatever validation you need by adding your own validators:
Ext.onReady(function () { // creating a text field and adding validation for its value var field =
Ext.create('Ext.form.TextField', { fieldLabel: 'Some Text', name: 'text 0cc13bf012
