zend_f3.pdf. keymaker-embrace.ivt.bluesoleil.v6.4.249.0.x64.Incl.Keymaker.Q: How to create a hyperlink in sencha touch? I am new to sencha touch. I am creating an app. I want to add a hyperlink in a table view. I am not able to find it anywhere. Please tell me how to create it. A: Use the base tag in html: Link JS equivalent: this.attributes.href = Ext.String.format('link/item/id/val/') Microsurgical techniques have been successfully used in the management of a variety of spinal and extraspinal lesions. In the thoracic spine, bone or bony fragments that become displaced in the spinal canal (Nabulsi et al., 1981) or fracture into two or more pieces that are displaced in the spinal canal (Ouzounian et al., 1984) can be removed by means of a series of laminotomies. Removal of intradural fragments can be done safely and expeditiously if a sufficient approach to the spinal canal can be obtained (Ouzounian et al., 1984). Extracapsular techniques have been successfully used to remove pieces of the vertebral column that have inadvertently protruded into the spinal canal (Nikitin et al., 1988; Sakurai et al., 1990; Dingli et al., 1992; Vega et al., 1993; Bailey, 1994). While the techniques of microsurgical removal of extraspinal lesions have been described in the literature (Herndon et al., 1979), the capacity to remove bone fragments that have penetrated and lodged into the epidural and intradural space has not been demonstrated. To date, the literature describing thoracic spinal surgery focuses on long-term improvement and cessation of progressive myelopathy, but little attention is paid to the occurrence of complications or continued functional disability. Two studies have shown that immediate pain relief after laminectomy is usually quite good, but that by the time patients with lumbar canal
