What's New In?

Stardock has released an updated version of ScanDisk that includes a Native version of Backup Exec 2012 R2. The new ScanDisk Native Edition now supports creating images, migrating existing devices, and migrating backups to either StarWind NAS or Amazon's S3 cloud. This update is offered as a free download from stardock.com. The new ScanDisk can be downloaded for a limited time only. As a special promotion, StarWind can donate its second drive to a lucky winner of the limited edition of ScanDisk (NAS) Edition 2012. By downloading ScanDisk 2012 and completing the platform to download and run StarWind's own software solution to recover data and unmount partitions, you can be sure that you will receive StarWind's second drive as a prize. StarWind Software's ScanDisk is a professional data recovery software with a simple interface. In previous versions, it can recover and rebuild partitions on any drive, including physically damaged disks. It is also capable to recover partitions from storage devices such as flash drives, cameras, smartphones, digital cameras, MP3 players, digital cameras, USB drives and other media. ScanDisk can be used to recover data on hard disks, disks in RAIDs, portable drives, USB-Flash drives, MP3 players, digital cameras, portable drives, SD cards, external hard drives, digital SLRs, scanners and cameras.
