In 2019, the market has changed. "It's all about the replacement cycle," says Torque Black, vice president of sales and marketing at e-Dynamics, a maker of rugged networked computing solutions for service providers and enterprises. "People are throwing away devices that cost \$10 to \$15 and replace them with a newer model for twice as much. But that's often because of the price point. A \$30 tablet might not be as robust as a \$50 one, but it's a better option." The result: Smaller, more affordable devices are more durable than ever. And that is good news for IT pros. But it's also important to note that the new breed of inexpensive tech has its downsides. Smaller, more affordable devices are more durable than ever. Just because a tech device is smaller and cheaper, that doesn't mean it's better. "It's still fragile," says Henry Chang, vice president of marketing at the VeloCloud enterprise mobility management company. "A lot of it has to do with our markets. It's easy to have affordable tech, but it's not necessarily easy to market it. It's certainly worth using, but it's more expensive than the average consumer tech.💎"
