Smart Diary Suite Portable is a feature-rich and user-friendly application that helps you keep track of important events, meetings and essential tasks, add personal or work-related notes, as well as store information about numerous contacts and the supervise the intake calories you consume every day. Thanks to its portability the app can be copied to external drives and used on any computer, storing all your private information along with it. It's wrapped in a well-organized and modern layout divided into a calendar on the left side of the window, a file viewer and previewer, and structured sections for each option (overview, diary, schedule, tasks, notes, nutrition, contacts). Set up your journal and personalize your records with images and symbols When starting it, the tool asks if you want to create a new diary or open an existing one, if case you already used it at least once. For the first choice, you have to select a destination folder, file title and name, date of birth, along with the option to set a password, run it at startup and choose a life factor for the provided ones. The first step you can do is write a new diary entry, which brings a well-packed word processor with many functions to help you personalize your content with various font types, styles, colors and sizes, as well as insert tables, images, symbols and attachments. If you want to schedule an important assignment, a few details are required, such as a description, start and end time, recurrence interval and pattern, reminder, along with the status, covered category (e.g. personal, business, vacation, anniversary, holiday) and optional notes. Enter and handle ongoing and completed chores, along with your daily meals When you need to accomplish one or more chores everyday, its hard to keep up with what you completed, so this is where the tasks function comes in handy, to help you easily plan and manage your assignments. It comes with fields such as description, priority, type(started, pending, finished, canceled), group and start, due and completion time. For nutrition the same editor is used, including the option to insert various ingredients, by inputting their name, category, total fat, carbohydrate, protein and calories values so that you can supervise your intakes. What's more, the tool lets you enter and organize all your personal and office contact information, which requires the full name, company, different phone numbers, email, website, home and work addresses, as well as partner and children names, and profile image. Other worth mentioning tools are the possibility to change the diary background image and the theme, backup function, database maintenance and password-protection. Conclusion All in all, Smart Diary Suite Portable is a reliable and interactive utility designed to help add, edit and manage daily journal entries, notes and tasks, as well as enter and
