Stunnix Advanced WEB Server Crack With Key

Stunnix Advanced Web Server is an advanced CD-ROM web server that makes it possible for you to serve any web site from an optical disk. With this application you can use a CD-ROM to run and execute any website that uses any of the following programming languages and databases: * PHP 4, PHP 5 (mod_php4, mod_php5), Perl 5 * Python 2.2 * Java 1.5 * Firebird * MySQL 3.23 * SQLite If your site uses any of these languages and databases, you can create a web site that you can access from any CD-ROM, DVD-ROM, or USB media. Then, you can install the site on the hard drive and run it from your desktop. This CD-ROM web server, while fully functional, can also be used to serve web sites from a remote computer that has no installed web server software. You may even plug it into a Windows 2003 Server and run web sites that you have already installed from an optical disk. A CD-ROM works exactly like a hard drive in that it can be read and written to from a computer. Stunnix Advanced Web Server runs both the CD-ROM and the web server from the CD-ROM. Stunnix Advanced Web Server is an advanced CD-ROM web server, that makes it possible for you to serve any web site from an optical disk. Enjoy a beautiful new web browser for your Apple computer.
