It's no lie that the Playstation Vita is making some serious inroads into the smartphone and tablet markets. The PS Vita has seen some great success in Japan so far with great games, but the rest of the world has been slow to catch on. That is changing though. One of the largest PS3 communities is in the states of the US, and they are taking advantage of the power of the Vita with great effect. That means more games that can actually make use of the console's hardware, like the Playstation All-Stars Battle Royale is one of the best games I have ever played on my PS Vita. One of the biggest obstacles to this great success is the price point. \$300 or so for a decent gaming device isn't bad, but for the average joe it's a lot to fork over. That's where this game comes in. It's a port from the Playstation 3 and the Vita, and all of the great features that came with the PS3 version are on the PS Vita. The graphics aren't horrible, not good by PS3 standards at least, but are still pretty solid. The sound quality is also pretty good. Some of the characters also look a bit odd in motion, and it is interesting how they can just walk right by you. It's still fun though, and I will bet that when the first update comes out the graphics will be improved. The gameplay is the same as on the PS3 version, except that it does use the Vita's touch screen, where it can show different menus and other things. The controls are very responsive and responsive, meaning that even though the player doesn't have the feel of the actual device, it is pretty close. And that is just the tip of the iceberg. This game is just a teaser of what the PS Vita can do. If you want to get a Vita at the current price point, you will have to wait until the end of the year, but the time is coming and this game is a great way to whet your appetite for it. As always, this is another example of an indie game coming to the PS3. It's fun, and the graphics are actually pretty good for a game from an indie developer. My only gripe is that you can't actually buy this game for \$10, but you can in the UK for about \$9. Those are my thoughts on this game
