In addition to the AI plugins, Adobe is creating a more artistic desktop app with true non-destructive editing that will let users apply these effects in after the fact. The goal is to create an editing app that makes getting the look you want and the feel you want easier than you already know it to be. This app, which is in the works, is known as Photoshop Next. Through the Creative Cloud, Photoshop users can manage and share large, edited files, which ensures they remain available for photoshop's tools when working on these files. Photoshop users are free to edit and manipulate these files once the image is uploaded. Users can further save time throughout the process by using Photoshop's layers, groups, and masks features.
